

CC-FP10 10 Ton Fitting Pusher

The 110 Volt Pump and swivel casters make it easy to take the CC-FP10 right to the job.

The CC-FP10 10 Ton 110 Volt Fitting Pusher takes the time consuming and difficult task of installing fittings on hoses from 2 inch to 12 inches and makes it quick, safe, and simple.

The portability of the CC-FP10 makes it easy to bring the Fitting Pusher to the job and it's ease of operation and versatility make the CC-FP10 the essential cost saving tool that no industrial hose shop can afford to be without.

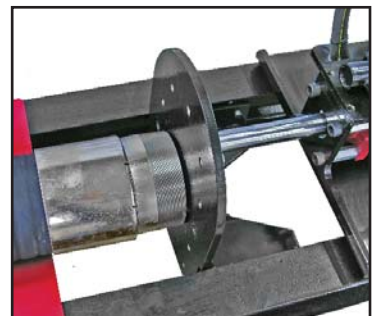

The elbow fitting adapter adds to the versatility of the CC-FP10.

This Fitting Pusher is a tool that will quickly pay for itself and produce a more consistent and better quality product from the very first crimp.

Contact CustomCrimp® for information and availability of the CC-FP10.

This fitting took 7 seconds to install.

The design versatility of the CC-FP10 Fitting Pusher makes it possible to handle virtually any hose from 2 to 12 inches.

CC-FP10 10 Ton Fitting Pusher

SETUP IS QUICK

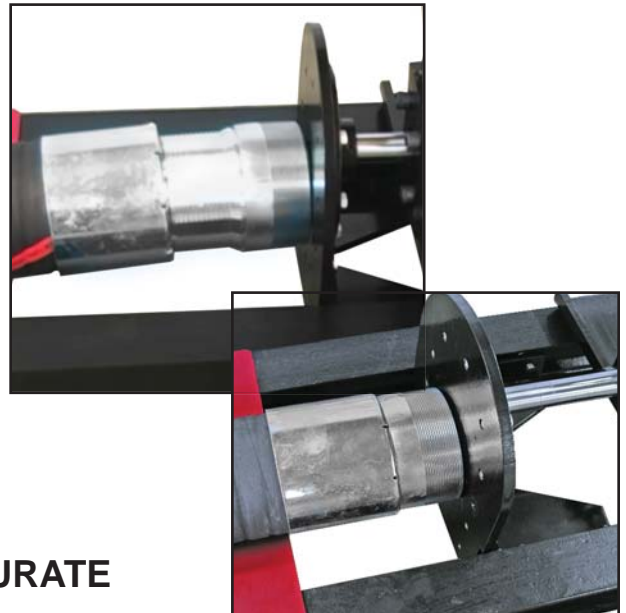

With the CC-FP10 Fitting Pusher's low profile, swivel casters, and 110 Volt requirement it can be quickly and easily moved to the job. The simple strap hold down system makes it easy to quickly and accurately position the hose.

OPERATION IS SIMPLE

Once the hose is positioned, simply start the fitting and actuate the 110 volt pump. The fitting will be accurately positioned in a matter of seconds. The 16 inch stroke and dual position of the ram accommodates virtually any fitting.

The fitting shown took approximately 7 seconds to install.

OPERATION IS SAFER AND MORE ACCURATE

"Traditional" methods of installing large fittings can result in damaged fittings, and at the very least is a time consuming procedure.

THE CC-FP10 WILL SAVE YOU \$

The speed, safety and convenience of the CC-FP10 will start to save you dollars from the moment you start to use it.
